Subject: RE: Action Items for Lancaster

Thanks, Donna. I was out for the holiday all Wednesday, and am now busy catching up with all of the e-mails. As to the two clarifications that you mention below, we could use some additional detail on what the agencies are looking for. On item 3, as to Manheim Township, we have developed a very rough cost estimate, based on our current thoughts about the effort that might be involved in a daylighting project. But, as we mentioned, the Township has not yet agreed to work with the City on these issues – that is where, as we said, we could use some assistance from EPA and DEP in encouraging the Township to come forward and engage. Until that happens, it will be hard to develop a more detailed plan than the rough ideas that we have currently. So on that issue, we can provide you with a brief summary of our project ideas and the related cost estimate. Is that what you are looking for?

Then on item 5, as to the details about the additional flow monitoring effort, we are thinking about that, so we can develop a proposal back to the agencies that we can all discuss. Can you tell us what kinds of details you all are looking for at this point? The more we know now as to what details are being sought, the less we will have to go back and forth later. So any further details as to your request would be appreciated.

Subject: RE: Action Items for Lancaster

Fred,
Thank you for the list. It is consistent with my list and with the understanding of EPA and PADEP, with a couple of clarifications. First, on item 3, please provide a general scope of work in addition to the cost estimate. Second, on item 5, please provide details on the additional flow monitoring effort. I will be out of the office on Friday, October 2, so please copy Bob Smolski, Cate Tierney, Nels Taber, and Janna Williams when you send me the items below and the City's response to the draft proposed consent decree. We look forward to continuing our discussions with the City.
Donna

Subject: Action Items for Lancaster
Importance: High

Donna: Per the discussion on our recent conference call, I have listed below the action items for the City that we have from our meeting notes. We will provide each of these items within 2 weeks from today (i.e., Friday, October 2). If you have any questions, or think that we missed or got something wrong, please let me know. Thanks.

1. GI Plan – City will provide additional detail on GI projects, beyond information in this Plan
2. Rain gauges – City will provide an updated map that includes several new gauge locations that are being planned
3. Manheim Township – City will provide an estimate for costs involved in daylighting
4. North Basin pump station – City will provide peak and average flow numbers
5. Flow monitoring – as to question about 10/31 storm, that was used for verification purposes; as discussed on our call, City will perform additional monitoring going forward
6. Infiltration testing – City will provide a subset of the site-specific test results, to reflect different project types and different levels of infiltration
7. GI sites – City will provide a map that includes all 160 sites
8. WWTP hydraulic issues – City will provide analysis and schematic
9. Force main C factor – this was addressed during Wednesday's call; field-measured data will be used in next round
10. Model update list of tasks and schedule – City will provide a proposal
